

Smart Computer Repair Policies

It is important to understand that a Manufacturer's product warranty is limited. Generally this is limited to the computer's electronic parts. Software fixes and installations are not covered unless otherwise stated.

Please be advised that it is the end user's responsibility to understand the impact of upgrades to the operating system, applications and utility software. Such upgrades can lead to incompatibilities and possible loss of data. Computer hardware and software work together and incompatibility may not become apparent until a later date. We advise contacting the manufacturer of your software regarding compatibility issues.

- Smart Computer Repair requires the original software media to perform installations.
- Smart Computer Repair is not responsible for installation or recovery of copied software.
- Smart Computer Repair is not responsible for any form of data
- It is accepted practice to perform periodic file system maintenance. This can be done using utilities.
